

## SYSPRO Analytics

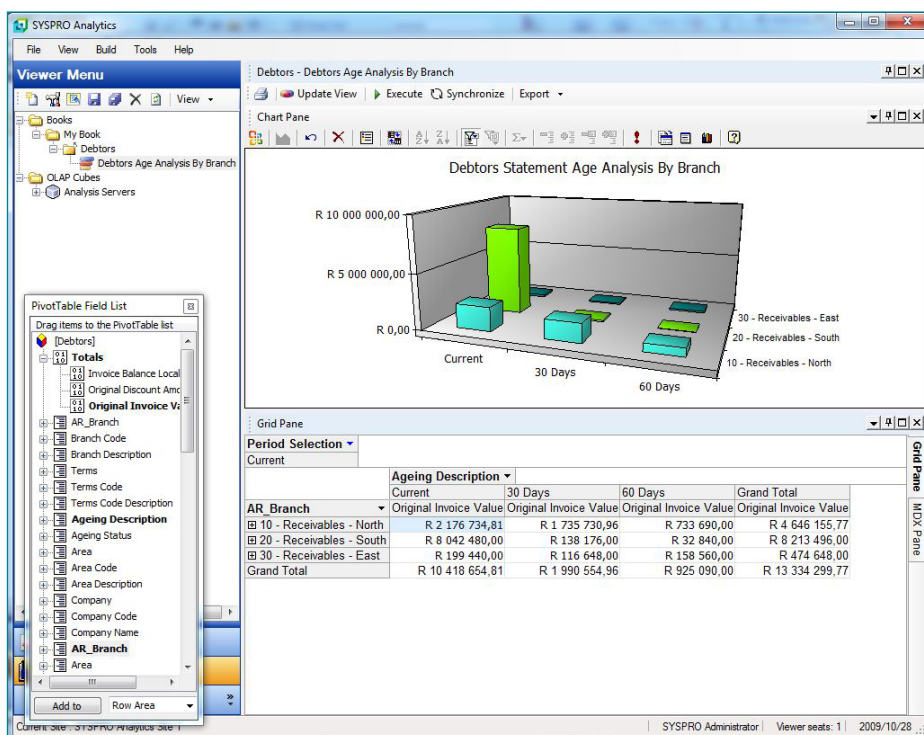

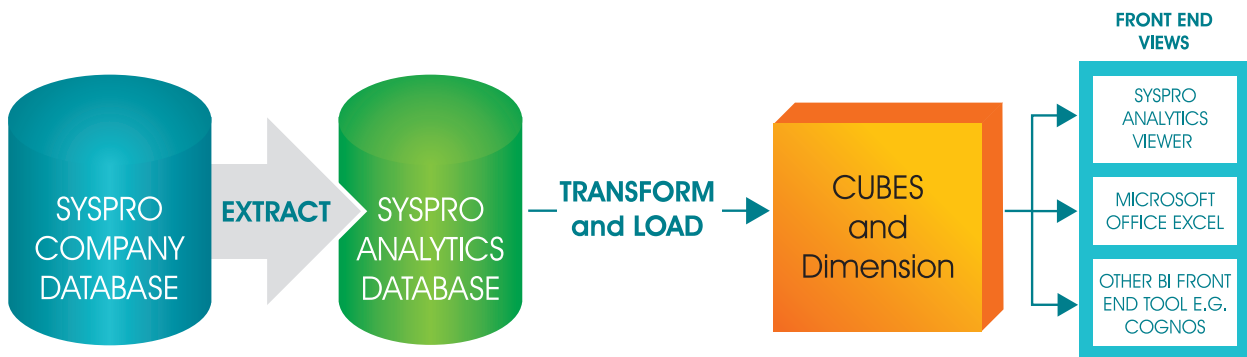

Fact Sheet

SYSPRO Analytics facilitates quick and easy access to the information you need to make decisions that impact your customers, sales, profit, growth opportunities and business operations.

SYSPRO Analytics enables you to make proactive and accurate strategic management decisions using a multi-dimensional view of information extracted from transactional SYSPRO data. It provides the ability to measure your business in today's highly competitive environment through an intuitive analytical framework that builds and supports the key performance indicators of your business.

You can create multi-dimensional views of your financial and operational data to determine patterns and underlying trends, gauge performance, leverage opportunities and outmaneuver the competition.

SYSPRO Analytics is an easy-to-install, easy-to-configure and easy-to-use metric-based application. An in-depth knowledge of SYSPRO data structures is not required as this powerful tool provides a series of intelligent analysis objects and metric templates that intuitively build the required processes for the information needed. This allows you to access information promptly instead of wasting time learning the intricacies of BI technologies before they can be of any use.

## The Facts

Fact Sheet

### The Benefits of SYSPRO Analytics

- Archive historical data to optimize transactional performance in SYSPRO
- Collect and transform relevant data into information and knowledge
- Quick access to complex queries across all business functions:
  - Analyze operational performance and monitor compliance
  - Manage sales performance and track trends in customer activity
  - Proactively measure product issues
  - Monitor delivery and shipment trends and performance
- Make informed decisions based on the state of your business
- Scalable and customizable to meet specific requirements
- Quick and easy to install and configure
- Removes the need to understand the intricacies of BI technology
- Deliver key information in an effective, efficient way
- Encourage interaction, analysis and exploration of key information

### SYSPRO Analytics Features

- Various alternate viewing options or templates
- Access to large amounts of historical data for trend analysis
- Customizable look, feel and content of graphs, grids and templates
- Intuitive interface
- Back end configuration
- Graphical and grid display of information
- Built on Microsoft .NET framework
- Export views to Microsoft Excel and PowerPoint
- Auto generate ETL for any SYSPRO table
- Create business rules through Stored Procedures
- Extend data for use by other analytical applications
- Interact with Cubes using any compatible OLAP front end
- Data archiving

### Integration with SYSPRO

- SYSPRO Analytics seamlessly integrates with SYSPRO modules
- Non SYSPRO data can be included in the overall framework for a complete view of your business
- Integrates with Microsoft Word, Excel, PowerPoint
- SYSPRO Analytics is dependent on Microsoft SQL Server
- SQL 2005/2008 only
