

Factory Documentation

SYSPRO's Factory Documentation solution enables better management of factory production by providing factory production staff with clear and accurate user-defined shop floor documentation regarding the tasks to be performed and the materials required

The Value of Factory Documentation

- Produce material requisitions for components
- Provide visibility of expected start and completion dates for each operation within a job
- Set the expected duration of each operation
- Produce production staff with routing instructions
- Provide visibility of materials issued and operations completed, including quality control
- Inform the production staff of the next operation to be performed (for routing)
- Prepare job packs

Matching Factory Documentation to your business

- Define up to four different factory documentation formats, such as:
 - Job Tickets
 - Material Requisitions
 - Route Cards
 - Travelers
- Print barcodes on documents for use with automated data collection devices
- Include operation instructions, technical notes and material notes on documentation
- Print material requisitions per operation or work center
- Generate documentation for a range of existing jobs or for selected jobs
- Produce documentation for dummy jobs for a specified quantity based on a standard Bill of Material
- Reprint factory documentation as required
- Include stock code and job multimedia on documentation

Integration

- Integrates with the following modules:
 - Bill of Materials (Essential)
 - Inventory
 - Work in Progress (Essential)

Audit trails and reporting

- Status flags are maintained to indicate whether documents have been printed for each job
- Reprint documents if required

The screenshots show three overlapping forms from 'The Outdoors Company'.
