

Customisation

To provide a number of facilities and features that enables the system to be configured to match business processes and better suit individual user requirements.

The Value of SYSPRO Customisation

- Configure setup options per module to suit your business
- Protect your business processes (and your data) with security settings
- Personalise your work space by tailoring the menu system
- Reorganise information in queries and list views
- Trigger applications or processes as events occur
- Customise SYSPRO functionality using e.net solutions - a component architecture designed to allow SYSPRO functionality to be accessed and utilised by other applications and technologies such as Microsoft® .NET
- Change the look and behaviour of the standard user interface
- Customise queries and processing screens per user, group or company
- Incorporate external data
- Extend business processes

Benefits of Customisation

- Customisation is version independent
- Easy to implement without the need for high-end technical people
- Easily deploy changes across the organisation
- Flexible and adaptable user interface
- Leverage investment by extending current feature-set
- Improve efficiencies with greater interaction between users and the system
- Integrate external processes and disparate systems

K3 Factsheet

Customisation

Matching SYSPRO to your Business

- Find information quickly and easily by rearranging the screen layout
- View additional relevant data using customisable Quick Views
- Increase productivity and reduce data entry errors with logical repositioning of fields
- Easily navigate to other SYSPRO programs through customisable hyperlinks
