

## Executive Views

### Objective

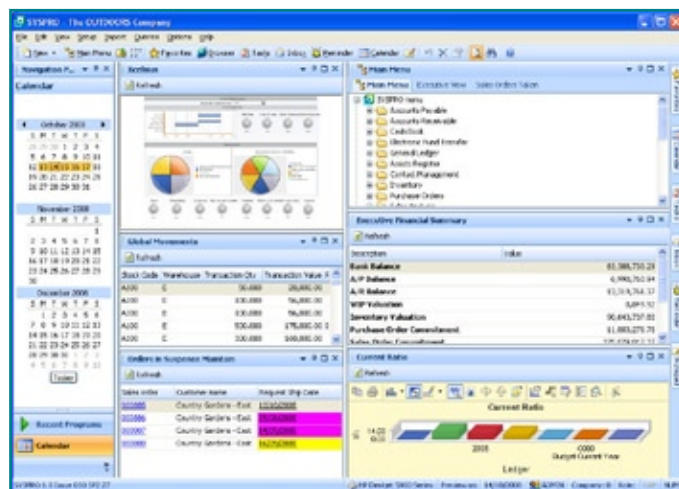

Executive Views can be quickly and easily created using SYSPRO's customized pane technology.

### The Value of Executive Views

- Define views using built-in templates or construct custom views using VBScripting
- Out-of-the-box functionality provided by the built-in templates offer high-level views of your business and how it is performing
- Achieve a high level of interaction between customized panes and the standard SYSPRO product enabling you to tailor the SYSPRO User Interface to exacting requirements
- Automate a customized pane to refresh itself after a specified period of time
- Deliver dynamic data alerts to anyone in the organization using the desktop alerts (popup windows) facility
- Drill down capability from a graph or list view
- Create virtually unlimited number of customized panes per SYSPRO application
- Include various objects such as a graph, web browser, list view, Crystal report or PDF document in a customized pane
- Display list views in a data grid
- Point the report viewer to a crystal report (.rpt) either at load time, or use a VBScript to dynamically view whatever report you wish
- Point the PDF viewer to a PDF document either at load time, or use a VBScript to link PDF documents to key fields

- Hyperlink desktop alerts to SYSPRO programs or any other application
- Easily create and deploy an executive view to any one in the organization using the export/import feature
- Built-in VBScript functionality provides simple integration with SYSPRO e.net business objects making data retrieval simple and allowing for functionality to be added to Executive views
- Integration of external data into the SYSPRO Executive views provides a single interface across systems

### Matching Executive Views to your Business

- Provide simple and pertinent presentation of transactional data into business information that can be acted upon
- Simplify the presentation of data for standardized use within a business
- Enhance efficiency by providing visibility to key information
- Define executive views per role, to facilitate the distribution of decision-making data
- Manage proactively by having relevant information, real-time, at your fingertips
- Desktop alert notifications enable immediate action when values exceeds defined tolerances
